#### **POLL RESULT** for GT issue May 1, 2017

Do you agree with CBSE'S rule to ban sale of books, uniforms, stationery, school bags in schools?

THE GLOBAL TIMES. MONDAY, MAY 8, 2017 WW.theglobaltimes.in

s PM Modi announced the discontinuation of the red beacon atop VIP vehicles, a move which was hailed as death sentence for VIP culture, the nation went in a tizzy and the babus were left dizzy. **Romika Chakraborty, GT Network**, brings you the red, yellow and green of now the late 'red beacon'.

#### Everyone is a VIP in India

**5,79,092:** that is the number of VIPs in India. In sharp contrast are other countries with UK at 84 VIPs, China-435, France-109, Japan-125, Germany -142, Australia-205, USA -252, South Korea -282 and Russia at 312. And if the whooping Indian VIP fraternity bothers you, then it should-n't. After all, everyone is a VIP in India - President, Vice President, MP's, MLA's, IAS, IPS, ICS to media barons; to sum up- 33 categories in total.

#### And we like it that way

"Tu janta nahi hai main kaun hun," is an often heard statement in the capital, where either you are a VIP or you are related to one, which is equivalent to being a VIP itself. So, when the privilege of jumping red lights, not having to stand in queues, getting VIP seats in cricket matches etc is taken away, creating a furore is only just the start. So, when Karnataka CM, politicians in Bihar, Madhya Pradesh and Telangana found it hard to part with their ID card of power, one could hear the sound of their heartbreak miles away. So while, the ministers act like spoilt kids, stomping their feet when their favourite toy is taken away, Delhi Police had a more rational reason for crying foul. When a similar order was issued by the Supreme Court of India in 2013 that limited the use of red beacons only for high dignitaries, Delhi Police had appealed the order. The Delhi Police pleaded that the colour red, which "triggers the quickest response from public", was "the best" colour for its operations. It cited that "red light has maximum penetration even in low-visibility conditions such as fog, dust and at night."

# Batti Gull

Imaging: Pankaj Mallik, GT Network

#### But some like it the other way

"VIP box me jaana hai? Toh Pepsi pi na yaar!" goes the tagline of a latest contest to watch the IPL finals, by the soft drink giant. Now that the PM seems intent on killing the VIP *keeda*, guzzling cola seems to be the only way to make it to the VIP stands. But it wasn't very long ago, when these contests were mere laughing matter, for everyone had a VIP pass. So, while the VIPs cried hoarse, guess who had the last laugh? The event organisers in the capital who were always busy organising seats and drinks for the VIPs, cutting down on tickets they could actually sell out.

#### Of course, some beg to differ

Thankfully enough, there are some who believe in the power of 'common man' even in this land of entitlement we call India. Amarinder Singh, CM of Punjab had tweeted doing away with red beacon in March, way before the PM Modi's mandate to do the same. Back in December 2013, Arvind Kejriwal's 49day AAP government in Delhi had banned red and blue beacons, and many individual leaders, including West Bengal Chief Minister Mamata Banerjee and Punjab Finance Minister Manpreet Badal, do not use beacons on their vehicles.

#### Red or no red, I'm a still VIP

VIP has become like a surname in India. You are born with it, and you die with it. Even when the red beacon is snatched away. Escort vehicles, heavy security cover, blocking traffic to make way for the VIPs, free passage at toll booths, special lanes at airports and railway sta tions along with a host of other privileges ensure that our not-somango-people do not feel let down.

So, while you and I may have to struggle to get a 3BHK on the outskirts of capital for 35k or may be more, the ones with the VIP badge are allotted houses in Lutyens Delhi by paying a rent of just Rs 2,000. And they said it's the end of VIP and babu's 'red beacon' culture?

Life is beyond books

*r* Neevita Narayan, chief audiologist & director, SpHear Speech and Hearing Clinic has been treating hearing impaired patients for over two decades. A graduate from AIIMS, she is passionate about paediatric hearing loss and is the founder of 'I Can Hear Foundation' that treats underprivileged hearing impaired patients. *Anahita Dembi, AIS Noida, XI* catches up with her at YP 2016-17, where she was a jury member.

Challenges of an audiologist When a patient comes to us (doctors), s/he is entrusting us with his/her life. The treatment we give to a patient goes at great length in determining his/her future. Knowing that you bear such a huge responsibility is a challenge. You need to be extremely dedicated to your job and live up to the responsibility you have been entrusted with. Most difficult case

Not many people are aware that hearing impairments can be corrected. To help people overcome such myths pertaining to hearing impairments is the first and foremost difficulty. Further, there have been lot of difficult cases. Anyone who is born with hearing impairments will also have speech disability. This is because speech is a learned process while hearing is a sense. Thus, it is a challenge for the audiologist as there is a serious responsibility to develop a sense, without which a speech will not be learned, no matter what.

#### Future scenario in India

India is definitely progressing towards a better healthcare infrastructure, in terms of audiology treatment. The government is allocating funds and working towards eliminating hearing impairment since this also affects speech delivery. Improved facilities in speech therapy are also being offered as it can help people lead a better and healthy life.

**Imp. of school newspaper** It is important to inculcate reading at an early age in children. One should always be aware

Dr Neevita Narayan shares her views with GT reporter

Pic: Amay Arora, AIS Noida, XI

about what is happening around us. Reading newspapers not just creates a sense of awareness but also broadens ones horizon. School newspapers are an important step in this direction. They help in inculcating the habit of reading at an early age, which in turn goes a long way in creating conscious and responsible citizens.

#### Student sensitisation

Life is beyond books and the four walls of a classroom. Life is about understanding various social issues that plagued the society at large. It is about working for the welfare of your nation and working towards making this world a better place. The youth needs to be sensitised towards social issues and the reponsibility they bear. Youth is the future of the country, and making them sensitive is the way to go.

#### Youth Power as a changemaker

I am really amazed at the way the school has taken up these projects. The work the students have done is amazing. The initiatives taken up by them were truly an eye opener for me. I wish I had such an initiative in my school. Youth Power, I feel not only exposes students to such social causes at a very young age, but also teaches them to tackle problems early on. Youth Power is truly a great platform for the young, ambitious changemakers of Amity.

Dr Neevita Narayan, chief audiologist & director, SpHear Speech and Hearing Clinic

mity Centre for Gender Justice and Child Rights (ACGJCR) in collaboration with Amity Law School, Noida organised Gender Fest 2017 from March 7-10, 2017.

DAY 1: The first day of the four-day event saw a guest lecture organised by Hindi Manch, the literary society of ALS, Noida. Dr Purushottam Agarwal addressed the students on the topic 'Redefining gender roles in Indian society'. In his lecture, he highlighted the current discrimination between the two genders. The lecture concluded with an interactive discussion, with several suggestions to overcome gender discrimination.

DAY 2: A Bollywood quiz 'Symphony' was organised by ACGJCR. The quiz

Students partake in the discussion

concluded with top three prizes given to the best teams. The second day of the fest also saw a series of guest lectures and discussions organised by Checkmate, the debating society, ALSN. With the theme 'Be bold for change', the lectures aimed at finding ways to create a more genderinclusive world. The guest speakers included- Ranu Kulshrestha, Associate Vice President and Group Head, CSR, Hindustan Power Projects Pvt Ltd; Karnika Seth, AOR, Supreme Court of India and cyber law expert; Avipsha Thakur, Executive Director, Roshni (NGO) and Aishwarya Bharti, AOR, Supreme Court of India. The day also saw Karnika Seth being accorded Honorary Professorship by Prof Dr Balvinder Shukla, VC, AUUP.

DAY 3: Hindi Manch organised a series of guest lectures on the theme- 'Third gender: construing the reality'. The lecture touched upon topics as gender politics, transgenderism, etc. The speakers included, Vikram Aditya Sahai; Akhil Kang; Ambalika Roy and Aryan Pasha. DAY 4: On March 10, ACGJCR organised an elocution on 'Contemporary issues regarding gender sensitisation'. With inputs from Ekta Gupta,

Faculty Convenor, ACGJCR

# **Poster making competition**

#### AUUP

s a part of the Human Value Quarter celebrations, a poster making competition was organised for the students of Atulasha\* at Amity University, Noida on April 19, 2017. The poster making competition organised by Srijan, AUUP's hindi literary club, saw participation of 30 students from Class VI and VII. Materials like colours, pencil kits, drawing sheets, etc. were provided to the participants. The panel of judges consisted of Dr Alpana Kakkar, Deputy Dean, DSW, AUUP; Dr Chanda R Akhouri, Officiating Director, AHF and Dr Mahima Gupta, Chairperson, Srijan. Sunil Kumar (VII) was declared the winner followed by Ajay Kumar (VI) at the second position. Other participants were awarded a certificate of participation. The competition concluded with vote of

thanks by Dr Mahima Gupta. \*Atulasha is a CSR initiative by Amity Group wherein over 500 underprivileged boys are provided education free of cost,

along with free books, uniforms and meals by Amity Humanity Foundation (AHF), under the guidance of Ms Pooja Chauhan, Vice Chairperson, AHF.

# **Student of the Year Award**

#### ASAP

C iddhant Gupta, an alumnus (Batch of 2016) of Amity School of Architecture and Planning (ASAP), AUUP added another feather to Amity's cap as his project was selected for ArchiDesign\* Student of the Year Award-Thesis (Architecture) 2016.

His thesis titled 'National Institute of Journalism and Mass Communication, Noida, India' has been selected for the prestigious honours. The project has also been selected for publication by one of the most reputed Journal in Architectural fraternity in India 'Journal

of Indian Institute of Architects' in its January-February 2017, Volume 82 edition.

For any B Arch final year student, 'Thesis Project' marks an important transition from student to professional life. It is for this reason that ASAP has mandated six stages of assessment for any student to qualify for thesis work with rigorous inputs from faculty and experts from the field. The effort is gradually moulding students to put efforts to produce best works nationally and internationally.

\*ArchiDesign Awards are promoted by ArchiDesign Perspective, India's leading architecture and design magazine.

Science & Technology

Plastic waste and other human generated waste thrown away in the oceans kill 1 million marine animals annually.

# Milennium discoveries

**E**very year, thousands of scientific discoveries are made. While some of them may not change much, others alter the course of history, reiterating how humans are the smartest species on Earth. Anirban Biswas, AIS Gur 46, XII discusses.

#### New prime number

Mathematics. Often considered the closest one can go to the writing of God. The subject never ceases to amaze anybody, especially when mathematicians discover a new prime number. The number is 2^74,207,281 -1, was found through an internet project Great Internet Mersenne Prime Search. So what is its use? Actually a very 'spyful' one! Modern code writing and breaking requires the use of Mersenne Prime numbers (prime number that is one less than a power of two and can be written as Mn = 2n - 1) and other complex numbers to encode data. Talk about numbers meeting James Bond.

#### The evolutionary link

Until recently in 2015, scientists had been looking for the missing link between apes and humans. But now they

think there is reason to believe their search has ended. In March 2015, scientists discovered a 2.8 million year old jaw bone in Ethiopiathus, extending timeline of the Genus Homo by 400,000 years. Again later, scientists found a set of bones in a cave. They were so different that scientist have classified them as a completely different species now known as 'Homo Naledi'. They stood just five foot tall and weighed 100 pounds. Their skulls are like early humans, but their brains are tiny, just the size of an orange. There is an ongoing debate whether the bodies were deliberately left in the cave, for the behaviour reflected the burying rituals of our own ancestors Homo sapiens.

#### The futuristic vision

We are on the next frontier of humantechnology amalgamation. A recent example is the Ocumetics Bionic Lens developed by Dr. Garth Webb, an optometrist in British Columbia. These lens will give patients a perfect vision and removes the chance of cataracts because the new lens replaces the natural one. The surgery would take merely eight minutes and would completely correct the patient's vision. The lens is first folded like a taco and then inserted into our eye with the help of a saline filled syringe. Once inserted, it unfolds within 10 minutes. Depending upon trials, this product could very well be available in the markets very soon.

#### **Fight with bacteria**

Everyone knows about antibiotics. Ask a sixth grader, s/he will tell you that it is used to fight bacterial infections. But what many people don't know is that the same antibiotics made by scientists decades back are still being used. No new antibiotic had been created or discovered. In the meantime, bacteria developed strains resistant to many antibiotics. Early in 2015, a team from University Northeastern in Massachusetts put a notch in the win column for medicine when it discovered Teixobactin, the first new antibiotic in 30 years. If those human trials go well, Teixobactin could be instrumental in dealing with tuberculosis, septicemia and various other diseases which are currently difficult to treat.GT

Solids Matter has.

Have you ever thought about what they are made up of? What would you see when it is brought closer to a microscope? You would see tiny particles, similar in nature. You would see Matter. Saurabh Jha, AIS PV, X peers through a microscope.

# Responsibility **Ironies of India**

With great power comes great responsibility. And therefore the power that one commands because he or she has been elected for a particular position or achieved a particular designation, also comes along with a lot of responsibility. For now they are the God's

'chosen' child to deliver the responsibilities entrusted upon them for a bigger purpose. How they deliver their responsibility is what makes them an important person, worthy of commanding the respect of others.

It is also important to understand that the designation and position they acquire or reach in their life are also earned with hardwork and therefore worthy of the person. But then if the person does not live up to the expectations of that position, he or she loses the respect. For respect is also earned and not commanded.

When our prime Minster Narendra Modi, espoused to all bureaucratic officials, politicians and government officials to give up the VIP culture, especially the habit of using the red beacon and replace it with 'EPI (every person is important)', he actually shifted the focus of people from the 'power' attached to the position, to the 'responsibilities' associated with it.

Infact at all point of time in life we are playing some role or the other. And we all have been entrusted with a power to perform that role. Every role that we play has been entrusted with some responsibilities. The need is to discover that power and the responsibilities associated with it. Use them wisely for your own growth, the development of the nation and the world.

# Beacon of Hope

Thirty years ago, when my friend Reema graduated from IIM and bagged a mind-blowing salary with a reputed multi-national, our celebrations were grand. Barely a year later, we heard that she quit her job and was preparing for her civil services exams.

"Why?" we asked. "You have everything: a dream job, bungalow, big car, foreign travel, and the purchasing power to get what you want." "Yes," she said, "but there is one thing I cannot buy."

ndia is a land of ironies - a country where a third of the world's poor coexist with a hundred billionaires. Half of the country is starving due to poverty, while the other half deliberately starves to lose weight. Shivang Seth, AIS Saket, XII, brings you a glimpse of our paradoxical world.

**So ja beta, varna police aa jayegi:** With cops around, Indians are more anxious than secure. On seeing a man in uniform, we instinctively reach for our seatbelts, helmets are worn and mobiles are kept away. The Indian standard for a traffic signal seems to be green for go, yellow for go faster and red to check for police. In the absence of any, hit the accelerator as hard as you can.

We always need someone to keep an eye on us. Parents at home, police on roads- why is it so difficult to do the right thing solely for self-accountability?

**Baba tera bhala karega (aur apna bhi):** On one hand, we have students studying 18 hours a day to get into one of the 'elite colleges'. On the other hand, there are some, laden in saffron and irrationality, sitting in a 'darbar' and giving out quirky advices making the world a better place and money,

hand over fist. Sample this:

Devotee: Baba meri naukri chhut gayi, kya karun? Baba: Beta, kal se samose ke saath hari chutney khaana. Sab theek hoga

We demand proof for a surgical strike while we seek advices from an underqualified person, without a question. Are our beliefs more about convenience?

**Apna sapna money money:** We Indians spend a lifetime saving money in the most bizarre manners. A T-shirt is first worn to outings, then becomes our nightwear, and finally ends up becoming a mop. However, most of this money that takes decades to save is spent at once, on a single ceremony: 'The big fat Indian wedding'. Relatable? *A coffee for Rs 200. Haggling with the autowallah* 

for Rs 20. Time to revise our saving skills?

**Time is omnipotent:** Indians understand the importance of time. Be it a queue at the movie theatre or a road packed with cars, we love barging our way to the front because none of us have any time to spare. Everyone is in a hurry and yet no one is on time. We are habitually late. But then so are VIPs. *It takes two to tango but it takes just one to break the queue for everyone to get into a fight, and get late.* 

# Motherhood or career?

There is no force more powerful than a woman determined to rise. Yes, you can balance your work and family, that is, only if you are determined to do so

#### Abhilasha Singh, Sem II, MBA Gen, AUUP

**66** The biological clock and the career clock are in total conflict with each other.

▲ Total, complete conflict," said Indra Nooyi, CEO of PepsiCo and mother of two daughters. A similar sentiment is echoed by many working women, across the world.

The 21st century working woman seems to be met by the constant dilemma: take a break from work to raise kids or grab the opportunity to go up the professional ladder? Attend the parent teacher meeting or join the meeting that could possibly give you a raise? As the 'either or' hovers over working women, the end result, more often than not, is what has been described as the guilt syndrome. With so much to do and a difficult work-life balance to achieve, something or the other is missed out, some priority tends

#### Perspective

tions or are unable to get back in the working sphere Statistics show that the participation of women in labour force has declined from 40% in 90s to 24%. And sadly, only 5% of the 24% women in labour force are able to make it to the top.

So the question is how does a woman manage? In the words of Indra Nooyi, "it is a difficult situation." The answers lies in the fact that no one can have it all. Accepting the situation is the only way forward. One simply cannot always be there for their child while managing her profession.

Working women should try to find an optimum work-life balance, the key to which lies in planning and organising. With a little bit of help from family and friends, they should strive towards creating an environment that works seamlessly. But most of all, women need to be persistent and brave in whatever they undertake.

"A car with a red beacon, the ultimate symbol of power."

The flash of the red beacon has always been a big lure for many who joined public service. The perk of the 'lal-batti' was such a strong narcotic for the ego that many, like addicts everywhere, ultimately failed their responsibilities.

From May 1 this year, the red beacon atop vehicles of public officials has been packed up and mothballed. Today, the only reason to quit a lucrative private job and join the ranks of government servants would be purely 'service'. Only time will tell if the Services and the coveted 'Chair' retain their charm. What we know for sure is that with 'lights out' for the red beacon, the show is over.

RIP, lal-batti. Bye-bye, VIP culture. The new India, where everybody is a VIP, is surging full speed ahead.

Can you see the flash of hope beckoning? GT

# Little pearls of wisdom Never give up

#### Achint, AIS MV, VIII

**Control of the series of the** 

Napoleon's will power did. That was Napoleon, what about you?

How do you deal with the obstacles and failures? Do you give up when the odds are not in your favour? Or do you keep trying? Success never comes to those who give up easily. It is only the ones who keep chasing their dreams and keep trying, who are ultimately able to find a way. Never give up just like Napoleon. When the going gets tough and you are thinking of giving up, remind yourself that no journey is worth telling if there were no hardships to overcome. At some point of time in the various journeys that we embark on in our lives, we reach that point where we feel like giving up. In such situations, tell yourself that there is light at the end of the tunnel. So instead of giving up, get up and try walking again.

# GT M@il

#### Dear Editor,

The Global Times edition dated May 1, 2017 was indeed an interesting read. Each colourful page of the edition unfolded with extremely well thought out and creative articles, be it the article on patriotism in the present age or the cover story highlighting and discussing the reality pertaining to the amount of freedom writers and journalists enjoy around the world.

I also found the article 'Growing up Pangs' very relatable. That article sheds light on the fact that no matter how much learned or experienced you may feel, each phase in life will bring forth new things to learn, more challenges to face. Definitely, I would say, with its myriad and interesting articles, GT never fails to brighten up one's day! Sakti Subramaniam AIS Noida, XI H

<sup>&</sup>quot;What?"

**AIS Saket** 

In 1950, the world had 2.5 billion people; and in 2005, the world had 6.5 billion people. By 2050, this number could rise to more than 9 billion. The human population on Earth has grown as much in the last 50 years as in the past four million years.

Where will you go after this?

Has it ever occurred to you that once the planet called Earth is destroyed, we have no other place to go to. Save Earth, after all it is the only home we have. Students of AIS Saket and AIS Noida took their first step towards saving their planet as they reveled in Earth Day celebrations through numerous activities

ur very own planet earth has given us numerous things-air to breath, food to eat, and a place we can call home. And yet we do them more harm than good, by bombarding it with endless waste, some of which is easy to reuse and recycle. Students of AIS Saket tell you how.

#### **Containers and buckets**

#### Prisha, AIS Saket, VI

Impact: Take a look around in your kitchen. You will find that majority of items are stored in plastic containers. The reason - plastic containers are cheap, easy to use and require minimum maintenance. So while they are easy on us, they are not so easy on the environment. Case in point the toxic gases they release into the environment. Many variations and different combinations of resins and polymers are used to generate types of plastic which leaves toxic gaseous elements. Barely 10 percent of plastic is recycled and to be more precise 'down-cycled', for instance, from a soda bottle to winter coat insulation and finally reaches landfill.

Be a green warrior: We cannot eradicate plastic from Earth at once but minimalise its use by adopting the following measures:

Use stainless steel containers, break proof glass water bottles, glass or ceramic mugs et al.

Re-use waste buckets in the garden as pots, as an organiser for small household items or for storage of toys, near the main door for holding slippers and shoes or as storage for dirty linen or clean rolled up towels.GT

#### Toothbrush

#### Sharanya Gupta, AIS Saket, VI

Impact: Toothbrushes are a good idea as far as dental health is concerned but it is bad news for the environment. They are made from a toxic combination of plastic, rubber and nylon. Currently none of these elements are bio-degradable and remain in the land pit for long. In fact, they release toxic chemicals when destroyed. If they end up in oceans they can be consumed by marine animals which is harmful. If cle chains, baby bottles, shoes, and scum deposited in they are burnt they emit toxic gases which further oven and tiles. causes greenhouse effect.

**Be a green warrior:** We can minimize the wastage For grooming pet hair. of toothbrushes when they are no longer useful for Another solution is the use of bio-degradable prodcleaning your teeth by using them for other purposes. uct, bamboo instead of plastic handles.

Garden markers for seeds in pots.

astic bottles and pens can be re-used

#### Akshat, AIS Saket, VI

Pen

**Impact:** Did you know that more than 10 billion pens worldwide are disposed every year? And what's worse is - a majority of these pens are made from non biodegradable plastic. Also, different inks and metal points increase the toxicity of pens disposed in waste. The waste is either disposed of in the landfills which doesn't degrade into manure or thrown off in the oceans where the marine life is impacted due to the ink toxins or the beaches are washed off with the dirt. Be a green warrior: For the damage they cause, it is important that we reuse and recycle them.

Wrapping ribbons, threads of wire on an old pen to prevent them from tangling up and for easy storage! Also, a new alternative to disposable toxic pens is paper pens made of waste paper with metal bodied refills and where each pen carries a seed which grows into a tree. G T

### **Plastic bottles**

#### Aria Puri, AIS Saket, VI

**Impact:** There goes the coke in my tummy and the plastic bottle on the road. In US alone, over 50 billion plastic bottles are produced every year. Made up of toxic material, these plastic bottles damage our environment like no other. It takes almost 450 years for a plastic bottle to break down and decompose. And even when they do breakdown, they emit toxic gases, which are harmful for the entire ecosystem, humans included. The key ingredient to make plastic bottles is crude oil. Over 47 million gallons of crude oil per year is wasted to produce plastic bottles which can be

#### used for other purpose.

Be a green warrior: For all of the above reasons we should discontinue purchasing plastic bottles and adopt some of the following measures in day to day

Encourage the use of jute bags which are biodegradable in nature.

Various innovative items made up of plastic bottles such as vertical garden, chandelier, jewellery stand etc. can help recycle plastic bottles causing adverse change in the environment.

An eco-designer, Michelle Brand, designed an aesthetic curtain most people would perceive to be waste or rubbish. The fabric of the curtain is composed of the base of plastic bottles, which have been cut, sanded and then tagged together!

#### **Plastic glasses**

#### Shayna Singh, AIS Saket, VI

Impact: Just like other non biodegradable items, plastic causes damage to the environment, when dump both on land and water. When dumped on land, they prevent absorption of water and minerals by the soil, thereby deteriorating the soil quality. In water, the consumption of these plastic glasses put both terrestrial and aquatic animals at risk through ingestion and suffocation. The recycling of plastics consumes enormous amounts of energy.

Be a green warrior: The most viable option is to reuse plastic glasses:

- Re-use plastic glasses as plant hangers, lanterns Use them as moulds to make candleholders.
- Every time you drink coffee or tea, use mugs. So friends, let's all do our bit and make this planet

Thanks to the tremendous amount of reckless waste disposal, we have a garbage island floating in our ocean, mostly comprising plastics - the size of India, Europe and Mexico combined! The garbage dumped in ocean every year is roughly around 14 billion pounds.

# Earth hour; need of the hour

#### Soumva Singhal AIS Noida, XII I

arth hour is a worldwide movement organised by WWF, which aims at encouraging everyone to turn off the lights for an hour. This planet is our one and only home. We have no other choice and we must care for it. The act can be as simple as turning off lights for an hour, which will help in conserving energy for increasing the longevity of the human existence (we do need fuel to survive!). Here are 5 reasons why 'Earth hour' is important.

**1** It promotes action: The World Wide Fund for Nature (WWF), the official 'Earth Hour' organizing foundation, designed this act to push for legislative changes, and support their other projects, including renewable energy growth and sustainable agriculture.

**2** It's global: In 2007, 'Earth Hour' was started in Sydney, Australia. Today, it has become the world's largest grassroot movement for the environment, with 172 countries going dark at 8:30 pm local time.

**3** We can see it: Turning off the lights makes a powerful visual statement. Last year, over 10 thousand landmarks and monuments 'disappeared' including the Eiffel Tower, the London Eye and the Great Pyramids of Giza.

4 It creates awareness: The buzz around the 'Earth Hour' lead to spreading of information about various environmental issues. Last year, around 82 million videos were viewed between January and March, and 7.8 million digital 'Earth Hour' interactions took place between March 27 and 29 alone.

**5** It brings people together: No one It's your earth likes to sit alone in the dark! And that's how over 70 thousand 'Earth Hour' events checked into digital maps last year. Whether you get together with friends and family, or join a community event, Earth Hour reminds you of the need to come together to solve climate change. It's never too late, they say. Maybe its

not true for our planet. But instead of putting hands up in the air, let's turn retroactive thoughts into proactive actions. This time 'Switch off!' for good. GI

# Why we celebrate earth week

Arushi Gupta, AIS Noida, XI C

ur Earth is the only planet in the entire universe where To remember the 3A's- Awareness, Affection and Appreciation every year. Numerous activities, focussing on various environ-

mental issues are organised on the occasion and the following week. These activities aim at:

'LIFE' is possible till date. To celebrate the beautiful **T** o sow sustainability in the minds of our future generations

planet that earth is, April 22 is celebrated as Earth Day To nurture nature and plant more trees to reduce pollution level

Will you neglect it?

Or nurture it?

Will you tend it?

As it dreams upon the shore And imagine all the whales out there And hope they will sing some more

If you think of all the animals

- 1. Can you tell how old is the Earth? A) 2017 years
- B) 4, 20, 000 years C) 4.5 billion years
- E 2. Name the gas that trees ab sorb during the day? A) Carbon dioxide
- B) Nitrogen C) Oxygen
- 3. Earth is named after which Greek deity?

#### Ravisha Nautiyal, AIS Noida, XII J puff ing up our chests with pollution and smoke. Yet, we feel very proud of our intelligence and fail to recognise the importance of conserving our environment. What's done is done, but it is now time to protect our very own life support system. Anymore tampering will shatter it and we will be doomed. Make an extra effort to help preserve a planet that is too precious. An environment friendly living does not require much to do. Open your eyes and bring changes like cycling to The truth is that evolution has made us work, preferring baths to showers or arrogant. We have come a long way using the 3 R's of conservation. It should be every citizen's duty to protect our earth and our future.

# A sigh of relief

#### Lavanya Jain, AIS MV, IX

Topened my eyes. It was 5.45 am. Had it been any other day, I would have still been snoring, but today I was up and about. I was so anxious that I just felt like running away from everything. I got out of my bed, and started pacing back and forth in my room.

Thank God for the chirping of birds, I was distracted from the countless thoughts that rattled my brain. Glad that everything wasn't as gloomy, I tip-toed from my room to the balcony. As I stepped out of the room, I could see the

Ans

night slowly fading away and the sun piercing through the darkness. As I tried to focus on the pleasant sunrise before me, I suddenly felt a hand on my shoulder. I turned around to find my dad standing next to me. "What's wrong Ahana? How are you up so early?" he asked, looking all hassled. After all, noon was my default morning and this was perhaps the first time I was up without him waking me up for an hour.

I stood there, still as ice. My dad held me by my shoulders, looked at me straight in the eye and said, "Relax Ahana! It's going to be alright. You are going to be l stood there, still as ice. My dad held me by my shoulders, looked at me straight in the eye and said, "Relax Ahana!"

fine." I wanted to believe him, believe that everything will turn out just as expected, but nervousness had got the better of me. With a warm hug and more words of encouragement, my father left me to my own. I saw him leave for office, and it dawned upon me that it was just my world that had come to a standstill. The rest of the world, my dad's office included, continued as usual.

I was still in the balcony, when I heard Sharma uncle tell my father, "Must be really tensed today? After all, it's the day of the final judgement." I was nervous before but Sharma uncle's words left me nervous as a wreck.

With all the courage I could muster, I geared up to face the day. I turned around to walk back to my room. I saw my mother run towards me and give me the tightest hug possible. "You've done it again, Ahana! You topped your boards," she said, with the widest smile I had ever seen on her face. With those words, I finally heaved a sigh of relief.

# **Choco oreo cake**

Bhargav Ram, AIS Gur 46, IX

Baking Time: 5 mins | Serves: 3-5

#### Ingredients

Oreo biscuits1 packet
*
Milk1 cup
Baking powder3/4 tsp
Sugar
Butter1 tbsp
Rainbow sprinklesFor garnish

#### Process

- Crush oreo biscuits in a mixer till it becomes a fine powder.
- Add baking powder, sugar and milk to the crushed biscuits. Mix well in a mixer again.
- Take a microwave safe bowl, line it with parchment paper and grease it with butter.
- Transfer the mixture to the bowl and keep it in the microwave on high (800 watt) for 5 mins.
- Insert a toothpick in the cake. If it comes out clean, the cake is done.
- Once baked, let it cool and remove the cake from the bowl by turning it upside down.
- Decorate the cake with sprinkles.

## WORDS VERSE Thank you ma'am

#### Anika Joshi AIS Vas 1, VIII D

Thank you ma'am For being our friend Thank you ma'am For building our future

Thank you ma'am For being our inspiration Thank you ma'am

Verse of confession

#### For your words of motivation

Thank you ma'am For being our coach Thank you ma'am For always being there

Thank you ma'am For all you did Thank you ma'am For nurturing us as leaders.

#### Shyam Goel, Sem II, ALS, AUUP

Burning myself every second

Losing them gives a lot of pain Once in a month I see you in your best Wonder what happens to you in the rest

Ans:

Ans:

You hardly realise I have burned a lot They see you, they feel you It's just me who hasn't got your grace

Everyone sees that I burn for you This fearless fierce love is not new People praise you in poems and rhymes But only you and I are for lifetime

Every fortnight some shades you gain

The near you come, the farther you go Will God ever end this to and fro? I wish in such a way we soon align That we, sun and moon, together shine

What I witness on your lunar shades I wish the solar eclipse never fades And I see you till the clocks go dead Trust me it's just you in my head.

# The stolen serum Illustration: Dinesh Kumar, GT Network

#### Aaarat Chadda, AIS Noida, VI

t was a dark and dusty night. The scientists at the California Science In-L stitute were packing the newly discovered C-P01 serum. It was a miracle serum, which could cut through anything, even a metal and hence the scientists designed a special cell to safeguard it from the intruders who could misuse this serum. They appointed Jacky, a spy for the safety of the serum.

Jacky was a smart and alert spy. He would always check each and every corner of the lab every one hour. But the lab was already scanned by a gang of rob-

And one day when everyone left the lab, they entered from the back side of the building, climbing the pipes, that led to the room. Jacky, who was sleeping in the room, imediately sensed the trouble and sprinted into the scene with a band of police officers. He caught the thieves red handed. The thieves however, had hid the serum and Jacky could not retrieve from them, as they feigned not having it.

bers. The robbers waited for the moment.

The robbers were put behind the bars. Two prison attendants were appointed to keep eye on the thieves, but the attendants turned out to be greedy, and they struck a deal with the thieves to escape the prison

Jacky was always alert, he would check each corner of the lab every one hour. But the lab was already scanned by a gang of robbers.

in exchange for money as they had planned to sell the serum for 10 million dollars to an international gang of thieves. As per the plan, one night, the attendants escorted the thieves out of the prison to a safe place. Just when the thieves were about to hand over the money, Jack along with a team of police ambushed and arrested the attendants and the thieves. Jacky's smart and timely intervention worked out in retrieving the serum from falling into the wrong hands, which they were hiding all along. The whole plot was hatched by Jacky. With the help of the police he had put a tracking device in the uniforms of the attendants and tracked all their conversations and movements.

Jacky and the other police officers were rewarded by the President for uncovering the deceiving plan and getting back the C-P01 serum. G T

MOST

# **Fire breathing dragon**

#### **Materials Required**

- Toilet paper rolls
- Green construction paper
- Small size pom poms
- Medium size pom poms
- Medium googly eyes Tissue paper -red, yellow and orange
- Glue stick

#### Procedure

- Cut green construction paper in the size of a paper roll.
- Now use glue stick to attach the

green paper to the roll.

- Take two medium pom poms, glue one googly eye on each pom pom.
- Attach googly eyed pom poms on paper roll and keep aside to dry.
- Paste small poms below the roll. (Refer image)
- Now, cut red, yellow and orange tissue paper in the form of strips.
- Use the glue stick to attach strips to the inside of the paper roll.
- Blow through one of the ends and you can see the flames coming out.

f the few things in life that gives a bittersweet, a paradoxical pain and pleasure feeling while taking one on a nostalgic roller coaster, 'moving out' is one. Be it moving out for a job or a new college, or even a new career, 'moving out' is not just about the physical effort of moving furniture and paintings; it is about boxing up memories, 'to be handled with care'. For those who are yet to experience this blissful fiasco, let's acquaint you with the strenuous yet oddly pleasing process of shifting and a life changing memory.

#### Missed me?

The room is a mess, with you sitting in the middle of the floor, surrounded by your belongings that are sprawled in every possible corner. Amidst all the chaos, stumbling across nostalgia hardly comes as a surprise. In one corner you find a picture of you and your friends dressed up as vegetables for the school's sports day, while another nook houses the teddy bear you used to have at five, and under the pile of clothes is the blanket you never slept without. Old pictures, toys, clothes- every little thing you have ever owned is in front of you and in that moment you can't help but let old memories flood your mind.

#### **Bizarre Boxes**

Once you overcome the nostalgia (which consisted of an hour where you simply looked through your old belongings with a goofy smile), the actual process of packing begins. The thing with boxes is that they are amazing- in how you can just wrap up your whole house in something rectangular made up of cardboard and duct tape- yet absurd- for this rectangular storage, no matter how big always turns out to be insufficient. And so you end up having at least six boxes of just your clothes, three boxes of your action figures and Barbie dolls, and atleast 10

Moving on is more than packing and labelling boxes; its a reflection of your soul and a stamp of myriad memories

Handle with care

boxes of your study books and novels.

#### **Moving Away**

Packing? Check. Loading? Check. Now comes the part where you have to leave. It's never easy to uproot your whole life and move to another place, to leave behind the place where you grew up, and it is while standing in front of your childhood home that you realise how real the shifting is. Moving away is tough but it is a door to new experiences, so with a

final teary-eyed goodbye you turn around and walk towards a new chapter of your life.

#### Moving In

Once the quota of tears and memories is complete, it is time to get pragmatic as settling into a new place is anything but easy. It is a new place, a new town and even a new country. Everything is packed, the only place to sit in the new place is the still bubble wrapped (not for long though, considering how we love to pop those bubbles) chair that by some magic does not have a box kept on it. It is an ordeal to arrange everything. But even in all this chaos, true happiness finds its way.

As a consequence of the kitchen not being set up yet, pizza and takeaway burger becomes the meal for a few days (and really, who wouldn't want that?) Even the local shopkeeper would by now know that you are the new customer. It is a whole new world. Good luck!GI

especially when they're about saddi Dilli! Arushi **Dayal, ASCO, AUUP** pens down about the YouTuber.

ing to us, is culture to them, what's frustrating to us, is bemusing to them, and what we spend hours avoiding, they'll spend hours studying and researching. Originally from Florida, Ford Seeuws with his wife and daughter moved to start making video logs of their life in India in 2011. Our very own Delhi, became their new home. The couple professes that their attraction towards India is the history, culture and the chaos of Delhi. When we are so busy in our life and end up at complaining about age-old traditions, this very chaos is what amuses them and makes them feel right at home. The historical monuments, diversity in types of neighbourhoods (how annoying we know), the street food culture and the wide amalgamation of communities opened the window for them to

Delhi. Being a Delhite is savouring the tastes from all the corners of India.

#### you must follow.

We have become a little too caught up, a little too busy, in the back and forth of our jobs and other things. There is none or little time to go back to what we belong to. Our culture and ethnicity is what we have forgotten. But thanks to people like, Ford Seeuws, who have this unadulterated love for the country and its colour, culture and traditions.

Ford Seeuws is the man behind the YouTube channel, 'The Surfing ViolinThere are anecdotal videos about his family's first Indian wedding as guests, their first ever experience of celebrating an Indian festival, tips on where to chill in order to beat summer heat, and last but not the least, videos on the Indian political scene.

Honestly, you will be surprised by how much we don't know about the city we call our home. Sometimes. it takes a foreigner to make us realise that.
