AMITY'S TODDLER PROGRAMME

Ages: 15-28 months

Learn, Laugh, Explore!

Share precious moments of bonding with your little one!

75% of your toddler's brain develops before the age of 3 years.

At this crucial formative stage, a lot of learning happens naturally during a toddler's play and exploration. However, research indicates that some explicit instruction from observant and sensitive adults is required to build on a toddler's emerging literacy, numeracy, social, creative, musical, physical and cognitive skills.

At **amitots**, we create enriching learning opportunities for you and your toddler by setting the scene for developmentally appropriate activities through free play, circle time, creative arts, music & movement and storytelling under the guidance of our experts.

Registration Open for 2018 Session
